## Road Race and Premium Street Sintered Pads

- **MORE stability**
- **FASTER bed-in**
- **MORE bite**
- **STAINLESS radiator plates**
- **Better heat cycling**
- **LONGER life**
- **REDUCED rotor damage**

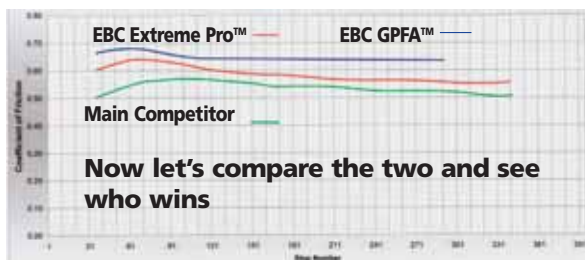

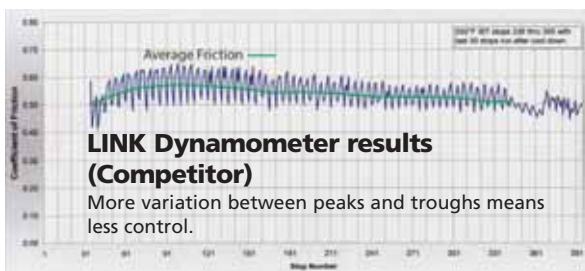

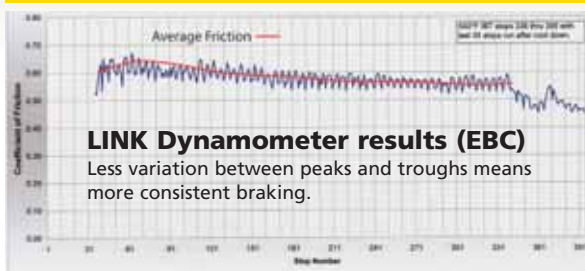

EPFA series Extreme Pro pads have been well accepted by road racers, track day riders and street riders who wanted the ultimate in stopping power and for 2011, we have extended the EPFA range and added a limited range of a new even higher friction compound known as the GPFA range. The GPFA range is strictly race only, is not legal for street use and is quite simply more brake effect than most streetbike riders could handle.

GPFA pads are priced identically to EPFA, range available shown below.

## WHICH PADS WORK BEST ...

For almost 30 years Harley riders have appreciated the softer organic pads (EBC Kevlar® formula pads) which offer fingertip stopping, great brake feel and much less rotor damage. EBC now also offer longer lasting American made sintered metal pads for improved life.

## OVERSIZE DISC CONVERSIONS

250mm, 280mm or 320mm discs constructed with forged alloy centre hub for weight reduction and tough billet steel 4mm thickness brake rotor for maximum stopping power. These rotor rings have extra weight reducing scraper holes and are riveted together with a nine button sturdy rivet system.

The rotors **COME COMPLETE WITH ANODISED ALLOY RELOCATION BRACKETS** for the various models listed below and are supplied as a kit with the complete rotor unit and anodised bracket. The brake hose will need to be replaced with a longer version.

# CLUTCH KITS FOR STREET/DIRT/ATV

## STREET - 3 choices

### 1. Standard - CK Series

Almost identical to original equipment clutch plates the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

### 2. Race/Sport SRC Kevlar Series

A Kevlar paper lined plate set complete with heavy duty clutch springs (for bikes fitted with diaphragm type springs we cannot supply a heavy duty spring kit), the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC Kevlar series are longer life, higher heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series.

### 3. Race/Sport SRK Series

SRK complete kits include Kevlar® fiber lined friction plates, steel separator plates and springs to provide a streetgoing kit for high performance street and road race use much similar to the DRC program for off road. Some of the kits will now feature new **DIAPHRAGM** springs as used in many larger new bikes to provide a complete clutch rebuild kit for every sportbike possible.

## CSK CLUTCH SPRING SETS

DIAPHRAGM TYPE SPRING

COIL TYPE SPRING

Always fit new springs which get tired after miles of heat and use. EBC spring kits are 8-10% stiffer than standard and are sold in engine sets. As stated in general fitting/safety instructions, advise customers that lever will feel slightly 'heavier' when uprating springs, and to test ride/acquaint themselves with this change in control.

## DIRT/ATV - 2 choices

**BEST CHOICE**

### 2. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

EBC only sell complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminum separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the drive case, change the oil and rebuild the clutch with a complete DRC kit which includes STEEL separator plates that not only prevent wear but increase flywheel effect of the engine and improve performance.

### 1. Full Kit - DRC Series

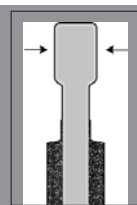

The US #1 selling off road clutch

Why are these the best???

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.
- Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevent premature driven plate wear, oil muddying and loss of stack height.
- EBC DRC kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

**What makes EBC the BEST!!!**

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.

CLUTCH APPLICATIONS

# EBC Coil Spring Kits

Full engine sets of heat treated and tempered spring steel coil springs with a guaranteed tension of 15% above standard. Clutch springs are an extremely important part of a motorcycle transmission system and we take very seriously the accuracy of spring tension in the EBC range of CSK kits. See application pages for part numbers.

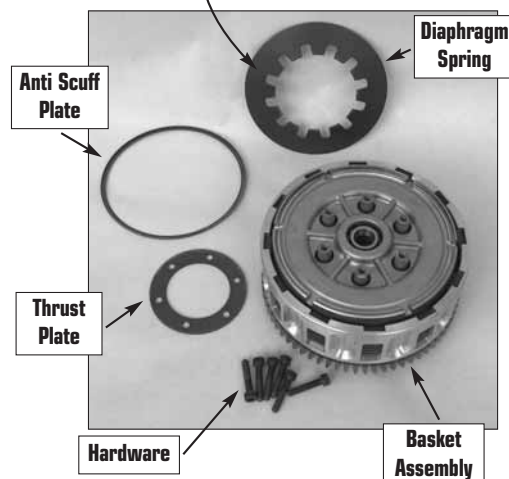

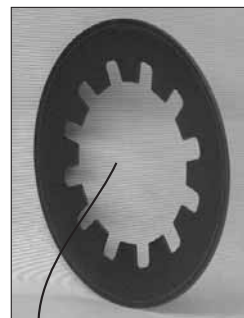

## Spring Tension Measuring Machine

You simply cannot engineer coil springs correctly without such a device as shown here. EBC have one of these digital clutch spring tension calibration machines at each of its locations to guarantee the accuracy and consistency of spring batches. The machine is calibrated based on the nominal spring deformation and then a tight tolerance of variation is achieved within the target and then a tight tolerance of variation is achieved within the target 15% upgrade range. EBC have tested many original and aftermarket clutch springs and the variation in tension is enormous and varies so dramatically, that we took the decision to measure and calibrate every clutch spring in-house to be sure of their accuracy.

# EBC Diaphragm Clutch Springs

EBC SRK clutch kits, shown on the following pages, include the new diaphragm spring range. Full engine sets of heat treated and tempered spring steel diaphragm springs with a guaranteed 15% tension upgrade.

The picture opposite shows a typical aftermarket billet clutch and how the assembly looks. It is essential when replacing the diaphragm spring that the anti-scuff plate is in good condition. This is a rather flimsy steel pressing and can become bent or distorted in which case it must be replaced, this is a genuine part available from your main dealer only.

CLUTCH APPLICATIONS

**Costing far less than OE manufacturer tools, EBC strongly recommend selling a clutch tool for every clutch sold.**

**Many dealers have already ordered one of each tool and loan these to customers with a deposit to gain tool loan income.**

# EBC CLUTCH KITS

## EBC<sup>®</sup> HEAVY DUTY CLUTCHES & SPRINGS

EBC Clutches are totally Asbestos Free made from a cork based "anti-swell" facing impregnated with aluminium particles to reduce wear & heat fade. Kits are sold in pre-measured engine sets and should always be replaced in engine sets. **USE ONLY MANUFACTURERS Drive case oils and avoid lead or other anti-friction additives.**

**SOAK PLATES** in drive case oil before installing. EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip. Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

### CAUTION – SAFETY WARNINGS FOR CONSUMERS

The following warnings now appear on the underside of our clutch packaging. For stocks in older packaging that do not display these safety warnings, we strongly recommend you photocopy these essential points and advise customers.

Never start a motorcycle whilst in gear with clutch depressed. Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed. Hold front brake lever on when selecting gears from standstill.

Never engage gears from a standstill with engine revs above 1500 rpm. Check oil levels regularly.

When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle. Assemble the clutch as per the original manufacturers workshop manual.

# How To Make Precision Pilot Jets

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have to be perfectly accurate in their marked size and incremental size steps. This year EBC Brakes sister company ABAX Engineering in the UK has purchased the most accurate machine on the planet for this work shown below. ABAX pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.

## S&B FILTERS

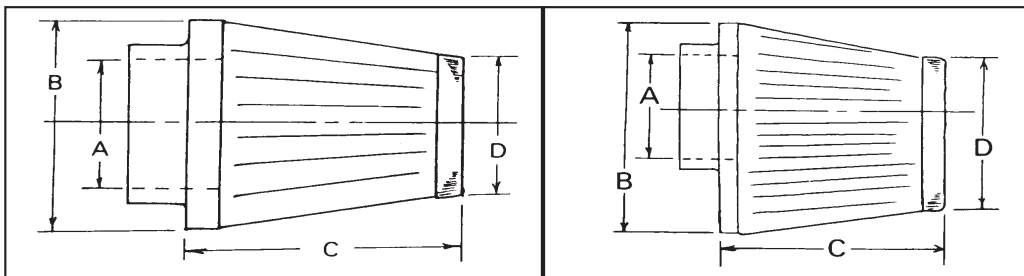

Made in the USA, S&B Custom Filters are a great choice for all types of carburetor and feature a special man made gauze called "Remay" made by Dupont® which has the benefit of perfectly uniform hole patterns. This enables the S&B filter to catch dust better than an oil soaked filter and to be run DRY. Oiled filters require regular washing and relube which plays havoc with carburetor balance. Available in parallel or cone type design, with high lustre chrome end caps.

## BAFFLE PAC

### BAFFLE-PAC-Silencer Glass. PART NO. BP-1

This material is labelled and conforms to BSAU 193T2. BEWARE of distributors selling cheaper roofing felt in its place. Repackable Tailpipes as the name implies require regular cleaning and repacking with BSAU approved "SILENCER GLASS" such as Winning BAFFLE PAC. Failure to maintain tailpipes in such a way will lead to clogging of the silencer wool and raised noise output together with reduced engine performance. Freeman Automotive (nor Dealers) are responsible for noise offences due to lack of maintenance as described above. "Recommended repacking period is every 3000 miles on two-strokes or when bike becomes noisy if sooner".
